POSITIONING

Product leader with 10+ years building and scaling AI-enabled enterprise SaaS in healthcare and life sciences. I specialize in turning bespoke enterprise delivery into repeatable, scalable deployments: tighter ICP, hardened integrations, measurable adoption, and GTM-aligned packaging. My operating edge is the intersection of complex regulated workflows, AI product strategy, and the systems thinking required to scale without variance.

WHAT I'M LOOKING FOR

Role: VP Product or Director of Product (CPO-track)

Domain: Healthcare / Pharma / Life Sciences / Regulated Enterprise SaaS

Stage: Series A-B growth or post-Series B standardize-and-scale

Geography: Canada or US Remote (open to relocation for the right mandate)

WHERE I WIN

- Enterprise / hybrid GTM where Product owns outcomes, not feature output
 - Regulated workflows requiring trust, governance, privacy, and auditability
 - AI-enabled platforms: conversational, agentic, search, analytics productization
 - Standardize-and-scale chapters: onboarding, integration patterns, guardrails, instrumentation
 - Tight GTM partnership: packaging, sales enablement, and defining what we won't do
-

PROOF

Time-to-Value 70% Faster

Cut enterprise deployment time from 90 days to 3 weeks by standardizing onboarding, guardrails, and integration templates across a regulated clinical SaaS platform.

7 EHR Integrations in 2 Years

Delivered 7 EHR / vendor integrations at Pomelo Health using reusable data contracts and integration patterns, protecting core product value and enabling institutional practitioners to connect within existing clinical workflows.

Org Scale: 1 to 10

Built and scaled the product organization from first PM hire to a team of 10 (5 PMs, 2 Designers, 2 BAs, 1 UXR) through Series A/B, acquisition, and exit to TELUS Health.

AI Data Product Commercialization

Productized Swoop's AI analytics layer, converting first-party conversation transcripts into identity-resolved, ICP-grade insights for Top 15 Pharma brands, directly improving deal quality and expansion metrics.

Pandemic-Scale Platform Launch

Shipped vaccine booking platforms across Canada and the US under extreme time pressure, supporting millions of patient interactions and anchoring a high-ACV Walmart Pharmacy deal.
